Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 10, the prior art of record fails to disclose or render obvious all of the limitations of the claimed invention. Particularly, none of the cited prior art describes the combination of the claimed partitioning steps, variable length offset field, construction of a segmentation table, construction of a Next Hop Array depending on a longest prefix match comparison, construction of a Compression Bit Map based on the value of the offset length field, and construction of a Code Word Array in the manner claimed.

While the Gupta and Nilsson references disclose some of the claimed features, such as pointers, compression, longest prefix matches, and Next Hop Arrays, neither reference discloses alone, or in combination with other cited prior art, all of the claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
